

Efficient cleaning with convenience

The battery version requires no electrical connections, thus offering greater freedom to clean just about anywhere. With a running time up to 30 minutes on the battery version and with extra battery packs the machine can be used continuously. At the same time, the power needs to be sufficient for fast, effective cleaning, and the dust bag must be large enough to avoid constant changing. Without these basics, a backpack vacuum cleaner is uncomfortable and impractical to operate. The Nilfisk GD5/10 backpack vacuum cleaner meet these criteria and more.

- User friendly and ergonomic design for flexible cleaning
- Containers in different sizes to fit the application
- 15 metre detachable cable with safety release saves time
- Low sound level for operator comfort and cleaning in noise sensitive areas
- Good filtration with HEPA filter option
- Suitable for left or right handed use
- Fully recyclable components used for reduced ecological impact

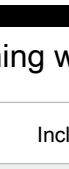

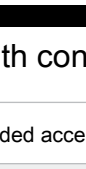

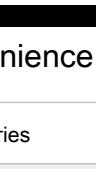

There are many things that should be present in a good backpack vacuum cleaner. It should be light in weight, with even weight distribution, good suction power and the noise level must be as low as possible. Picture shown may not represent model quoted
