

## Health&Safety Wet&Dry vacuum cleaners for ATEX Zone 22 explosive dust

Legislation (EN 60335-2-69) has placed some very tight restrictions on handling hazardous dust. The IVB 995 model will fulfill all demands at the highest level of safety to ensure maximum health protection. The IVB 995-0H/M SD XC TYPE 22 contains M and H-Class, as well as Explosive dust ATEX Zone 22 approvals. The use of EC technology meaning 2 single phase brushless motors and the complete conductivity makes this machine applicable in Zone 22 environments. The perfect disposal concept for industrial use and health endangerous and carcinogenic dusts. By choosing the correct AntiStatic container inlet in combination with the approved Type 22 accessories the vacuum cleaner allows you to work with a safe and spark free solution. The Stainless Steel SitDown container ensures durability and long life, and makes it possible to drive out without removing the motorhead. The standard Disposal bag (M-Class) or the included Safety filter bag enables safe dust free working and disposal. On top of the motor head you will find a big tool deposit and room to store your accessories. Equipped with the optional accessory basket you have all the equipment you need on hand. The AntiStatic Type 22 container inlet gives access to the entire range of approved Type 22 accessories to customize the vacuum cleaner to your specific safety needs.
